visitors welcome

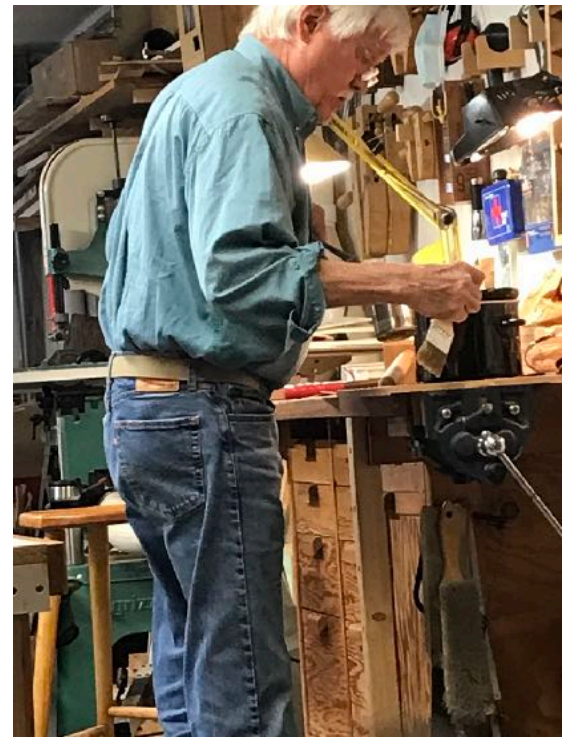

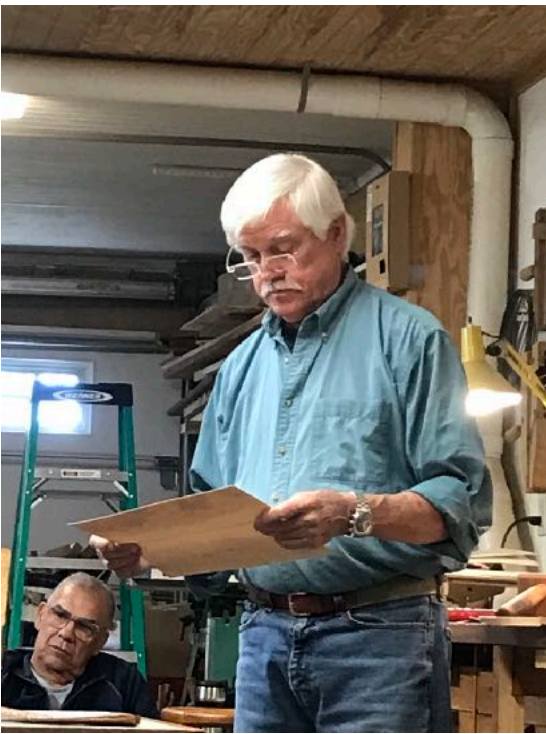

Our meeting for March had to be moved at the last moment because of a failure in the weather. Turned cold that weekend rather than the warmth we usually expect. Not sure if it was Jekyll or Hyde that called the surprise venue change... But either way Hyde, other wise known as Charles Walker did a great demo on Hyde Glue. Paul S has been using Hyde glue for the veneer on the backs of his chair also.

That stuff sticks but I do feel sorry for the horse.

Here is Hyde showing how to use Hyde Glue..

Charles doin his thing

As far as I know no demo set for next month. Maybe someone could do a demo on lathe work.. After all we paid for a lathe,, we ought to use it.

Beads of Courage we have 9 bowls and one box for donation now. Two more would make a even dozen.

New Member Maria Barr.. Paul and I got to meet her a couple weeks ago when she asked if we could look at her boat and suggestion on how to put in some shelving. Great gal and handy with a saw and screw driver. Lives on a boat at Jekyll Harbor and is restoring the great gal and handy with a saw and screw driver. Lives on a boat at Jekyll and restoring the old gal..(the sail boat, Not Maria) just in case you are wondering.

Re: the Coffee Table

That Cedar table that Paul S., and Charles W. built last year at the Jekyll Arts Spring Festival needs a home. Karen Grogan suggested we donate it to the big Flea.. It will bring in some money for our fine feathered,,, oops,,, no feathers but furry Critters would be a better description.
