August Meeting Segmented Demo by Roy Yarger

The August meeting of the GIWW will be held on August 11 at 10AM at 304 Brailsford Pl, St Simons Island. Our demonstration will be given by well known and former president Roy Yeager on segmented turning. He will show how to cut the segments, glue them up and turn into beautiful pieces. Come and learn how. Remember to bring a chair. Refreshments will be available as always. We still need a demonstrator for September, so see what you do that you could show to others. I have some additional wood pieces that will be available to members so be sure to come.

Dave Loehle, President

Roy Yarger is a nationally recognized turner, and will be sharing his process to create a segmented vessel like this one.

Based on the last time he showed us how to do a segmented vessel (several years ago!), this is one meeting you don't want to miss!

**“Thank You, David & Lucy”
For Hosting our Annual Members Picnic!**

**Next Meeting
