

Golden Isles Woodworkers and Woodturners

June, 2018

www.GIWW.org

The June meeting of the Golden Isles Woodworkers and Woodturners will be held at Dave's shop at 304 Brailsford Place, St Simons at 10AM on June 9th. There will not be a demonstration but rather a workshop on making carbide tipped tools. Material and equipment will be provided to make any of the shapes of carbide tipped tools, square, round or diamond. There will be a charge for the materials used, but it should be under \$20. I will have the tips, steel shafts, grinders for shaping, taps for the screw hole and some handle blanks. So if you ever wanted to try one of these but didn't want to spend \$75 to \$100 to try come and make your own.

We will also discuss the July meeting picnic which will also be held at Dave's house. The club will provide the meats and members will bring salads, deserts and appetizers. We need to know how many to expect so come prepared to say and if you have a preference for what to bring. Please also bring at least one of your recent pieces to show to the members. This is an important part of our monthly get togethers. Remember to bring a chair.

Useful Info

Here is a link to a web site that has some useful info. Especially helpful is a page listing recalled Tools:

Tools Critic

The [Recalled Tools page](#) is an extensive guide to the most popular tools recalled from the market due to safety concerns as well as information on how to tell if a product is affected and what to do in each case. This is a topic that it's not widely covered online and many people are not aware of the risk they take on by continuing to use these power tools, especially since the manufacturers offer completely free replacement of the defective products in each case. Check it out and Bookmark it.
