November Meeting November 3

The November meeting of the Golden Isles Woodworkers and Woodturners will be held on November 3rd at 142 Hampton Point Dr. This is at the northern end of St Simons. Hamp Stevens will give a demonstration on making wooden spheres from pentagon shaped wooden blocks. This is technically a dodecahedron which is then turned into a sphere. Hamp is the only turner making these solids. He will also talk about some of his other projects as he is an accomplished woodworker also. He has a self made CNC machine that he is offering to let members use. Meeting is at 10 AM and refreshments will be served.

Dave Loehle
President

Bandsaw Box Demo - Eddie Wildsmith
