

Golden Isles Woodworkers and Woodturners

November 2019

www.GIWW.org

next meeting November
9th, at
Charles Walkers shop.
110 Winton Dr.,
Brunswick, ga
Same time 10 am

Charles Walker location 110 Winton Dr., Brunswick has a white picket fence with sign at corner, says Winton Farms. Charles will be doing a demo on turning spindle for a lamp. If you remember he just finished a great looking folding table. Remember 10 am. 110 Winton Dr. follow driveway to back of house.

News

Charles Walker found some old tools that were a freebie to the club. They were in serious need of refurbishing. We need to discuss what to do with the tools. Dave and Charles has refurbished them and ready for sale. No cost to us cept labor. Dave is suggesting a tool garage sale. Members might have tools of their own to contribute. Good time to get rid of that old stuff sitting around. I know I have several hand and small machine tools put up for sale. Date to be announced.

The lady from the Brunswick Newspaper paper that contacted us is looking for several small bowls that would be used to hold various salts for a photo shoot she is doing for a January story. We need members to bring in some samples for her to choose from.

December 7-8 The club is showing at the Mistletoe Market on St Simons where anyone can have pieces for sale if they contribute to the booth fee. Good time to get your pieces out there for viewing and possible to bring in money to buy that new piece of equipment.

Dec. 14th Christmas party at Dave's Hopefully. we will have name tags. At the Christmas party new officers will be chosen. At present Dave has served 2 yrs.. Barb 1 yr , Craig 1 yr and Gerald too many to count. Officers should serve a 2 yr term.. That means we need a new Pres. Dave does not want to do it again. Put your thinking caps on.

Dec. 15th the club will do a demo at the Jekyll Island Goodyear Cottage Club.

****Remember to watch the Forum section for tools for sale on web site.

Kudos to Peggy Schmid's demo in Pembroke

Understand it was a long drive up to Steve's place but well worth it. Peggy turned a small lidded box using a Baxter Thread turning jig to cut threads in the top and body of box. The picture will tell it all. She also demonstrated the application of Canes crafting clay to decorate the box.

Applying an adhesive to the box, then pressing a thin base of clay to the box (using a pasta maker to press the clay into a thin sheet for the base).

Then cutting the various canes into this slices and applying the pieces onto the box for decoration. What in heck is a cane.

Next would be baking the box in a toaster oven at 245 degrees for 45 minutes-----this was not demonstrated due to time.

After the demo everyone dived into Barb's sloppy joe's, coleslaw and tater chips.. sides of pickles and soft drinks. Dave brought cookies.

After lunch the hands on class started.. Each member given a blank spindle to turn round. Cut tenons, part in half, hollow out the inside and shape as the member wished. The box lids were a slip fit with no threads.

We then cleaned up Steve Cook's shop. and a great thank you to Steve for letting us use his shop. Everyone had a good time if you learned one task its worth it.

pictures to follow

Peggy demonstrates cutting threads on lid of box

Peggy has the box already to go.. Next chase the threads or make them or cut them or whatever its called

Dave and Barb standing by or staying out of the way

Cut the threads using the Baxter jig.
Click on this to blow up.
You can see the threads inside the lip of box. Neato

Those are some great threads that look to be perfect.

Finished pieces are ready to be decorated.

Pressing the clay top into place

Wish I had been there to see all this and how it was done.. Looks far to complicated to me

Bragging and Show off

Herb

Oak tray for Low Country Boil.
