## September Meeting Make Your Own Cutting Board!

Following up on suggestions from the last meeting we are going to do a little something different this month. We are going to do a hands on workshop where everyone will make a cutting board. Attached is a picture of two of them using different woods. Due to a generous donation of wood by Norm there may not be a charge for the cutting board wood, all depends on how many want to participate. We need to know how many people would want to do this so that we can have the wood available. If there is not enough, the cost will be between \$5 and \$15 depending on the wood chosen, with Walnut being the most expensive. It will take more than one day due to the glue drying time.

The meeting is on September 8. Another option is to come and just get the information on building one on your own. We will have a regular meeting also as we need to discuss demos for the November meeting.

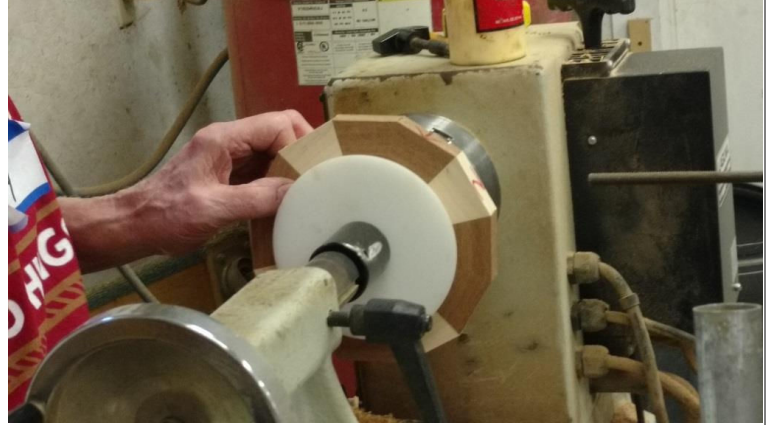

Suggested samples that Dave made:

**Next Meeting**  
**September 8, 10 AM**  
**At Dave Loehle's**  
**304 Brailsford Place**
